The Board, via its designated agent, shall determine an acceptable minimum frequency of screens. [It is anticipated that the Board will set an initial minimum frequency of screens of not less than four (4) times per month.] If the Board, the physician or therapist supervising his plan of care, or his employer deems that blood or urine screens are warranted in addition to the base frequency established under this paragraph, Respondent shall submit to such additional screens.
7. Respondent shall be responsible for obtaining a monitoring facility and reporting system acceptable to the Board, as well as for all costs incurred in conjunction with the monitoring and reporting required and any other expenses associated with compliance with this Order.
8. Respondent shall keep his supervising health care provider and monitoring facility informed of Respondent's location and shall be available for contact by his supervising health care provider at all times.
9. To be acceptable, specimen requests shall be random with respect to the hour of the day and the day of the week. In addition, the Dentistry Examining Board or its designee may at any time request a random monitored urine, blood or hair specimen from Respondent by directing the Department Monitor in the Department of Regulation and Licensing, Division of Enforcement to contact Respondent and request Respondent provide a specimen.

10 All requested urine, blood or hair specimens shall be provided by Respondent within five (5) hours of the request for the specimen. All urine specimen collections shall be a split sample accomplished by dividing urine from a single void into two specimen bottles. The total volume of the split sample shall be at least 45 ml. of urine. All split sample urine specimens, blood specimens and hair specimens shall be collected, monitored and chain of custody maintained in conformity with the collection, monitoring and chain of custody procedures set forth in 49 CFR Part 40. Urine specimen collections shall be by direct observation if:

- a. The Respondent must provide an additional specimen because Respondent's initial specimen was outside of the normal temperature range (32.5 - 37.7°C/90.5 - 99.8°F) and he refuses to have an oral body temperature measurement; or he does provide an oral body temperature measurement, and the reading varies by more than 1°C/1.8°F from the temperature of the urine specimen;
- b. Respondent's last provided specimen was determined by the laboratory to have a specific gravity of less than 1.003 and creatinine concentration below 0.2 g/l;
- c. The collection site person observes Respondent acting in such a manner to provide reason to believe that Respondent may have attempted or may attempt to substitute or adulterate the specimen. The collection site person, if he or she believes that the initial urine specimen may have been adulterated or a substitution made, shall direct Respondent to provide an additional observed urine specimen;
- d. The last provided specimen resulted in a positive or suspected positive test result for the presence of controlled substances; or
- e. The Dentistry Examining Board (or any member of the Board), the Department Monitor, or Respondent's supervising health care provider directs that the urine specimen collection be by direct observation.

If either of the above conditions (a) or (c) requires collection of an additional observed urine specimen, the collection of the subsequent specimen shall be accomplished within the required five (5) hours of the request for the initial specimen. The collection of the initial specimen shall not satisfy the requirement that the urine specimen be collected within five (5) hours of the request for the initial specimen.

11 The drug and alcohol treatment program in which Respondent is enrolled shall at all times utilize a United States Department of Health and Human Services certified laboratory for the analysis of all specimens collected from Respondent.

- 12 The drug and alcohol treatment program in which Respondent is enrolled shall utilize only those urine, blood and hair specimen collection sites for collection of Respondent's urine, blood or hair specimens as comply with the United States Department of Transportation collection and chain of custody procedures set forth in 49 CFR Part 40.
- 13 The supervising health care provider, treatment facility, laboratory and collection site shall maintain a complete and fully documented chain of custody for each urine, blood or hair specimen collected from Respondent.
- 14 Every urine specimen collected from Respondent shall be analyzed at the time of collection for tampering by measurement of the temperature of the specimen and the oral temperature of Respondent. Every urine specimen collected from Respondent shall be further analyzed at the laboratory for tampering by measuring the creatinine concentration and the specific gravity of the specimen. The laboratory may at its discretion or at the direction of a supervising health care provider or the Dentistry Examining Board or any member thereof conduct additional tests to evaluate the urine specimen for tampering including, but not limited to, pH, color and odor.
- 15 Every urine, blood or hair specimen collected from Respondent shall be analyzed for alcohol, amphetamine, cocaine, opiates, phencyclidine, marijuana, methadone, propoxyphene, methaqualone, barbiturates, benzodiazepines, meperidine or the metabolites of these substances. The Dentistry Examining Board or its designated agent may at any time direct that screens for additional substances and their metabolites be conducted by scientific methods and instruments appropriate to detect the presence of these substances. The laboratory shall conduct confirmatory tests of positive or suspected positive test results by appropriate scientific methods and instruments including, but not limited to, gas chromatography and mass spectrometry.
- 16 All urine, blood or hair specimens remaining after testing shall be maintained in a manner necessary to preserve the integrity of the specimens for at least seven (7) days; and all positive or suspected positive urine, blood or hair specimens remaining after testing shall be so maintained for a period of at least one (1) year. The supervising health care provider or the Dentistry Examining Board or any member thereof may direct that the urine, blood or hair specimens be maintained for a longer period of time.
- 17 For the purpose of further actions affecting Respondent's license under this Order, it shall be presumed that all confirmed positive reports are valid. Respondent shall have the burden of proof to establish that the positive report was erroneous and that the respondent's specimen sample did not contain alcohol or controlled substances or their metabolites.

- 18 If any urine, blood or hair specimen is positive or suspected positive for any controlled substances or alcohol, Respondent shall promptly submit to additional tests or examinations as the supervising health care provider shall determine to be appropriate to clarify or confirm the positive or suspected positive urine, blood or hair specimen test results.

Required reporting

- 19 The supervising health care provider and Monitoring Facility shall report immediately to the Department Monitor in the Department of Regulation and Licensing, Division of Enforcement by FAX or telephonic communication: any failure of Respondent to provide a urine, blood or hair specimen within five (5) hours from the time it was requested; or of any inability to locate Respondent to request a specimen. The laboratory shall immediately report all urine specimens suspected to have been tampered with and all urine, blood or hair specimens which are positive or suspected positive for controlled substances or alcohol to the Department Monitor, and to the supervising health care provider.

Each report shall state the date and time the specimen was requested; the date and time the specimen was collected; the results of the tests performed to detect tampering; and the results of the laboratory analysis for the presence of controlled substances and alcohol.
